## **RISK FACTORS AND MANAGEMENT'S PERCEPTION ABOUT THE RISKS**

### **Interest Rate Risk**

Interest rate risk is the risk that company faces due to unfavorable movements in interest rates. Changes in the government's monetary policy along with increased demand for loans/investments tend to increase the interest rates. Such rises in interest rates mostly affect companies having floating rate loans or companies investing in debt securities.

#### ***Management Perception:***

The management of the company is always aware of interest rate, which is concerned to the cost of fund of the company. The management prefers in procuring of long-term fund with minimum fixed interest rate and short-term fund with reasonable competitive rate. On the other hand management of the company is emphasizing on equity based financing. For the quarter ended September 30, 2016 the Company has no long term and short term debt.

### **Exchange Rate Risk**

Exchange rate risk occurs due to changes in exchange rates. The Company imports only machineries from abroad. All the Raw materials are procured locally and sales are also made locally and through sister concern. Unfavorable volatility or currency fluctuations may affect the profitability of the Company.

#### ***Management Perception:***

The Company imports only machineries for abroad. All the Raw materials are procured locally and sales are also made locally and through sister concern. Therefore, Unfavorable volatility or currency fluctuations will not affect the profitability of the Company much. Moreover, the exchange rate of the company is traditionally witnessed of upward trends, which make ample opportunity of export. On the other hand management perceives revaluation of local currency i.e. down trend to exchange rate will have little impact on profitability of the company.

### **Industry Risks**

#### **Profitability may reduce**

The Company is operating in a highly competitive industry with low profit & highly sensitive to the market. Moreover the Company faces competition from a number of private & public sector Textile mills those are found to be very aggressive in the market. Inability of attracting more buyers and keeping up with the competition in the market will hinder the company's growth potential.

#### ***Management Perception:***

The company has successfully accessed the market till date and is offering new and better quality products at competitive terms. Moreover the company's track record in the past years of operating in this highly competitive market establishes its capability.

#### **New Entrants may enhance competition**

New entrants of similar/higher scale may push the company in a competitive scenario.

#### **Management Perceptions**

Implementation of similar project generally have a lead time of few years, furthermore with the track record of Alif Manufacturing Company Ltd. (Previously-CMC-Kamal Textile Mills Limited) and its market reputation it will be very difficult for new comers to make inroads into the quality cotton yarn and fabrics market.

### **Market Risks**

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the

company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the company. On the other hand, strong marketing and brand management would help the company increase their customer base.

***Management Perception:***

The company set its focus in both local market and countries export market through inland back-to-back letter of credits. The management is trying to sell through direct contact with the customers (RMG & Knitting industries) in the selected regions understanding their needs. The company also has established relationship with potential buyers across the country and expects to find market for its capacity despite competition prevailing in the sector. Further, the commercial banks and financial institutions provide a thrust in the textile sector as they provide credit facilities to RMG & Knitting industries to acquire the yarn for their final products.

**Technology Related Risks**

Technology always plays a vital role for each and every type of business. Better technology can increase productivity and reduce costs of production. Firms are exposed to technology risks when there are better technologies available in the market than the one used by the company which may cause technological obsolescence and negative operational efficiency.

***Management Perception:***

The project is equipped with world's modern and latest machinery and technology and to cope with the pace in harmony with modern textile world the Company is continuing modernization program of its machinery. The plant and machinery implanted in the company's manufacturing plant, which are imported from world renowned brand name, are efficient and cost effective in its kind. The management of the company is aware of any technological changes in the future.

**Potential or Existing Government Regulations**

The Company operates under the Company's Act 1994 and other related regulations, Income Tax Ordinance 1984, Income Tax Rules 1984, Customs Act, 1969, Value Added Tax (VAT) Act and rules 1991. Any abrupt changes of the policies made by the regulatory authorities may adversely affect the business of the Company.

***Management Perception:***

Unless any adverse policies are made, which may materially affect the industry as a whole; the business of the Company will not be affected.

**Potential Changes in the Global or National Policies**

The performance of the Company may be affected due to unavoidable circumstances both in Bangladesh and worldwide, such as war, terrorism, political unrest in the country.

***Management Perception:***

The Company has different level of customers across the country to reduce the risk.

**History of Non-Operation, if any**

The company does not have any history of non-operation.

**Operational Risks**

Non-availabilities of materials/equipment/services may affect the smooth operational activities of the Company. On the other hand, the equipment may face operational and mechanical failures due to natural disasters, terrorist attacks, unforeseen events, lack of supervision and negligence, leading to severe accidents and losses.

***Management Perception:***

The compensation as well the benefit package will restrain the employees to leave their assignment and go for any employee movement for higher benefit packages. The Company is equipped with power backup and security systems, which reduce operational risk. Besides, the equipment is under insurance coverage in order to get reasonable compensation for any damages.

**LENGTH OF TIME DURING WHICH THE ISSUER HAS CARRIED ON BUSINESS [Rule-8(j)]**

Alif Manufacturing Company Ltd. (Previously known as CMC-Kamal Textile Mills Limited) is a public limited Company carries its commercial operation for the last 21 (Twenty One) years.

## **HIGHLIGHTS OF THE COMPANY**

### **EXECUTIVE SUMMARY**

Alif Manufacturing Company Ltd. (Previously known as CMC-Kamal Textile Mills Limited) produces only one item in its factory, namely, 'Cotton Yarn'. The product is used for making cloths for apparel purpose by the local weavers, textile mills and of course, by the Ready Made Garments sector for exporting abroad. The raw material is also of only one item, namely 'Raw Cotton'.

There are, however, various types of yarn as produced by the Company. The variation is in the form of Combed Yarn or Carded Yarn as well as in counts of yarn. Combing process is done to clear various kinds of impurities which are found in the natural fiber of raw cotton. Being a natural fiber, it also contains short fiber which is cleared in combing process. The end product thus comes out as 'Combed Yarn'.

Another type of yarn, namely, Carded Yarn do not go through the combing process and the yarn thus produced contains the above mentioned impurities and the price of the end product is comparatively less than combed yarn. There is, however, a great demand for Carded Yarn, especially by the middle class and low middle class people of the country who do not consume much fine quality of cloths always.

The yarn is also classified by its counts, higher the counts number, finer it is and costlier; and lower the counts number, it is coarser and less expensive. Alif Manufacturing Company Ltd. (Previously known as CMC-Kamal Textile Mills Limited) produces many & various counts of yarn, namely, 10s to 20s, 30s to 50s, 60s to 80s. 30s counts is produced in the form of both combed and carded while all other counts are in the carded form – even the fine counts of 60s to 80s.

It may be stated that if the production is in higher counts, actual production quantity decreases on the same machine whereas production quantity increases if it is of lower counts. Accordingly, although the actual production for the last few years show considerable variation year to year, it happened due to changes made in counts pattern the right yard-stick should, therefore, the efficiency achieved as shown in the table in previous page.

**Auditors' Responsibility**

Our responsibility is to express an opinion on these Financial Statements based on our audit. We conducted our audit in accordance with Bangladesh Standards on Auditing (BSAs). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Financial Statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstance, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management of the company as well as evaluating the overall presentation of the Financial Statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

**Opinion**

In our opinion, the Financial Statements give a true and fair view of the financial position of **CMC- Kamal Textile Mills Limited** as at March 31, 2017 and its financial performance and its cash flows for the period then ended in accordance with Bangladesh Financial Reporting Standards (BFRSs) and comply with the applicable section of the Companies Act 1994 and other applicable laws and regulation.
